

January 3rd 2017

Dear Sir:

Ref. Directive 2011/65/EU on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment.

Fastening components manufactured by Stanley Engineered Fastening are not electrically operated so ordinarily would fall outside of the scope of Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

They may be used in electrical and electronic equipment therefore we confirm that substances regulated by the above directive on the restriction of the use of certain hazardous substances in electrical and electronic products namely

- Lead
- Cadmium
- Hexavalent Chromium
- Mercury
- Polybrominated biphenyls
- Polybrominated diphenylethers

Are not intentionally used above their restricted or exempted limits in the manufacture of our components or present in a quantity above their exempted limit therefore we consider that the requirements of EU Directive 2011/65/EU are fulfilled.

Should you need any further detail please do not hesitate to give me a call.

Yours sincerely

Colin Thirlaway
